SUMMARY

iOS Developer with experience building native iOS applications using Swift, SwiftUI, and UIKit, integrating RESTful APIs and Apple frameworks to deliver performant, production-ready mobile experiences.

EDUCATION

BS Computer Science - FAST-NUCES

August 2021 - June 2025

SKILLS

iOS Development	SwiftUI, UIKit, MVVM, URLSession, Codable, Core Data, Async/Await, AVFoundation, Notifications, StoreKit 1 & 2
Web & App Development	Node.js, Express.js, React.js, Next.js, React Native (Expo CLI), MongoDB, Firebase, SQL, JWT, OAuth, RESTful APIs, Fast API, Flask API
Programming Languages & Tools	C++, Python, JavaScript, Swift, Git, Github, Bitbucket, Postman

EXPERIENCE

Associate Software Engineer – Pentaloop

November 2025 – Present

- Working on a **SwiftUI security suite** featuring **Web Shield** with unsafe URL detection, **email breach scanning**, **jailbreak detection**, and an **anti-theft system** with charger-removal and unauthorized pickup alarms.
- Developed a **storage cleaner** for grouping similar and duplicate photos/videos and **revamped the complete application UI**.
- Contributed to a **VPN iOS application** (UIKit), enabling seamless switching between **IKEv2** and **WireGuard protocols** and allowing users to select their preferred protocol.
- **Revamped the complete application UI** and optimized **network performance** and error handling, reducing connection failures by **20%** and improving response efficiency by **15%**.

PROJECTS

DeafEd

[Medium](#) — [GitHub](#)

React Native, Node, Express, MongoDB, Python, Flask API, OpenCV

September 2024 - May 2025

- Developed a mobile app to help illiterate deaf children in Pakistan learn sign language through real-time gesture recognition, addressing the needs of **95%** of the illiterate deaf population.
- Integrated animated lessons, increasing engagement by **60%** and improving learning retention among users.
- Designed an educator dashboard that improved student progress tracking by **75%** through real-time accuracy analysis.

3D House Floor Planner

[GitHub](#)

Next.js, TypeScript, React Three Fiber, Three.js, Zustand, Tailwind CSS

June 2026

- Developed a web-based **2D/3D house floor planner** for designing single-floor layouts with real-time top-down and perspective views, reducing planning effort for home and room layout design by **40%**.
- Built drag-and-drop room placement, grid-snapped wall drawing, and editing tools (move, rotate, delete, undo/redo) with **Zustand** state management.
- Implemented multi-unit land setup (feet, meters, centimeters), live dimension labels, total built-area calculation, and **JSON export/import** for saving and reloading floor-plan projects (*app in progress*).
